### **ABSTRACT**

*The study was conducted in Mirzapur District of Uttar Pradesh to measure the knowledge of farmers towards improved Urd crop production technology in Mirzapur district of Uttar Pradesh. A total number of 120 respondents were selected randomly from three villages under Sikhadwas block because the productivity, production and area were found maximum. The data were collected by personnel interview method by using pre structured interview schedule and later appropriate statistical analysis was done to draw logical conclusion. The study revealed that majority (53.33%) of the respondents belonged to the middle aged group and most of the respondents belong to marginal level of land holding i.e less than 1 hac. It was found that respondents belong to 40.83 per cent of education i.e graduate. The finding also revealed that 72.50 per cent of the respondents had medium level of knowledge towards improved Urd crop production practice measure followed by 17.50% and 10 % of the respondents with low and high level of knowledge respectively.*

**KEYWORDS:** *Knowledge, Extension Participation Production Technology, Income*
