ABSTRACT

The purpose of study is to provide the findings of a survey that was done to analyse how teachers and students are using electronic resources. in the Coimbatore District engineering colleges are using electronic resources. This paper presents the findings from a questionnaire-based survey that was carried out at a few chosen engineering colleges in the Coimbatore region. Analysis was done on the information that was obtained from the respondents via the questionnaires. Thus, the study amply has shown how engineering college library users effectively use e-resources. The study's findings will be beneficial in increasing library utilisation. The information gathered from the respondents via surveys was analysed. A randomly chosen sample of 1132 received the questionnaire from users. Only 1132 from 1263 questions were determined to be appropriate for this study, correspondingly representing the U. G., P. G., and Faculties are 452, 287, and 393. The findings reveal that library users how to effectively used the e-resources in engineering colleges at Coimbatore regional.
