ABSTRACT

When the soul is present in human body, the body does all the activities. But when human body dies, the soul disappears from the body. No sooner it leaves the human then the physical activities gets stunted. But do you know why it does not work? Our eyes, hands, mouth and each and every part of human body is very much there, but still the body does not work without the soul? Why? Soul is very vital for human body since it helps human body to work, eat, speak, walk...etc. This is the same power which works in the Universe system which in other words could be called the God Power.

The whole Universe is controlled by SUPREME GOD POWER. But Science fails to recognize this supreme God power, which always exists in the whole Universe. It is an ultimate truth. The Supreme God power exists in each and every soul of the Universe.

KEYWORDS: *Soul, God, Universe, Law of Conservation, Supreme God Power, Human Body, Science, Spiritual Power*

INTRODUCTION

This is a solemn effort to deliberate about the soul which is present in human body. When the soul is present in human body the body does all the activities like working, eating, speaking, walking, etc.....But when human body dies, the soul goes away and disappears from the body. The moment it leaves the human self then the physical activities stop abruptly.....etc. But do you know why it does not work? Physical attributes of human body is there, still the body does not work without the soul? Why? Soul is very vital for human body since it helps human body to function. This is the same power which works in the Universe system which in other words could be called the God Power, *Search on Google about Christianity, Bible (2019).*

The whole Universe is controlled by one SUPREME GOD. But Science fails to recognize this supreme God power, which always exists in the whole Universe. It is an ultimate truth. The Supreme God power exists in each and every soul of the Universe, *Google Search as Judaism (2018).*

SCIENCE CAN'T PROVE THE EXISTENCE OF GOD NOR COULD IT CREATE GOD POWER PRACTICALLY

As per our knowledge, we cannot create God particles since the power of God already exists in the whole Universe. That's called Supreme 'Power of God'. In fact, we are made by the God, so we can't make God or God particles. It's a universal truth. But some scientists are in pursuit of producing God particles, with no success as yet, *Search on Google as creation of God Particle practical Result (2019)*.

The supreme Power of God is present within our soul and also present inside all human beings and animals, birds and other creatures too. It is the power of the soul within us that makes us eat, work, speak, walk etc. But after our death, when the soul departs we can't do the same things. This power of soul means Power of God, which cannot be practically measured by Science. This soul is nothing but power of God which is very important. Similarly, in the Universe, Supreme power of God is very essential. It is this power which maintains planetary position in the Universe. A soul constitutes power of God within the human frame of body which functions in the Universe, *Search on Google as Sikh (2018)*. This theory is a fact without a shroud of doubt. Supreme power of God pervades the whole of Universe i.e. Moon, Earth, Jupiter etc. too. We can't see this supreme power of God with naked eyes. Because the power of God is without shape, length, width, volume, etc. God is "Nirgun", and "Nirvikar" as per Adhayatm Guru, *Shrimad Bhagawat Gita (2017)*. Along with the Universe, the supreme power of God has created us. If Science reposes faith on this Supreme power of God, then things could work out in better direction.

GOD POWER FUNCTION

Our Soul is the power of God and this power is present in our body. Our body activities such as eating, walking, working etc, are the result of our soul, but when the soul, which means power of God disappears from our body, our body will be there for sure, our eyes will be there, all things will be there, but it can't be termed as working. Why? Can Science answer this question? Who runs this system? Power of God is important. But our question is why the power of soul could be not measured by Science? *Quran (2018)*.

Power can be described in two parts:

- Supreme God Power (Nirgun ,Nirvikar).
- Physical Power (Bhautik Shakti)

Supreme God Power (Nirgun, Nirvikar)

Nirgun or Nirvikar is the power of God, the union of 'Atma' and 'Parmatma'. The power of God is without 'properties', but includes all properties in it. The power of God has no shape, no size, and no volume. The power of God is the supreme power which is present in the body as soul ("Atma"). This power cannot be seen with naked eyes and we can only experience the same within soul, *Search on Google as Bahai (1892)*.

Physical Power (Bhautik Shakti)

There are properties such as solid, liquid, air etc. These properties have some shape, size, volume etc. which we can see or realize by naked eyes. These properties are created by Supreme power of God in the Universe. These powers can be converted from one form to another, as per old 'Law of conservation'.

THERE ARE TWO SCHOOLS OF THOUGHT

Spiritual (Adhyatm)

Science (Vidnyan)

- *Spiritual (Adhyatm): In spiritual (Adhyatm) power thinking, it is comprehended that the Universe is created by the Trinity Gods Brahma, Vishnu and Shiva (Mahesh) from "Adimayashakti" .*
- *Science uses a different perspective and puts forward this concept in different words.*
- *Science (Vidnyan): Science believes that the whole world is made up of "Atom" (Anu Renu) which constitutes electron, proton, and neutron, which is bonded with energy.*

From the above discussion, it is evident that the two different streams of thinking, *Spiritual (Adhyatm) and Science (Vidnyan)* are in fact, one and the same. In other words it could be said that they are two different sides of the same coin.

God is Important in Our Life

If God is the driver, scarcely do we have a problem;

Otherwise, there is no scarcity of problems,

For everywhere, there are only problems;

But don't worry if you are passenger and the God is the driver;

Then life will be like a flowing river;

So keep in mind, always pray the God

Call him, Oh God ! Oh my Lord, please come.....

And always stay, in our lovely heart;

Come quietly and fill our life with peace, satisfaction and be our part;

Come into our being and give us a good direction as a director of our life;

Oh God! Oh my Lord, please enter into..... our life.

God is the supreme power in the Universe and we have utmost faith on Him.

You are the pure soul, the God power, the '*Parmatma*' who permeates our body in the form of hymns.

Our life is a journey and God is our driver. If God is our driver then our life is without hardships. In his absence our life becomes a messy hell with countless problems. There is no place where there are any problems. But our life becomes easy if we treat ourselves as passenger and the God as driver. Then, only our problems can subside. So a deep prayer calling God to stay in our heart shall bring the necessary quiet and peace in our life with utmost satisfaction. If we call God from the bottom of heart then our rudderless life attains a balance and good direction. God is supreme power in the Universe; we should have unquestionable faith in God. This solves your problems and makes your soul pure and unites you with the ultimate God power (Parmatma), *Search on Google as Zoroastrian (2018)*

GOD POWER CREATION AND DISTORTIONS IN THE UNIVERSAL

We know that according to the old law of conservation '*energy is neither created, nor destroyed*', *Google search results on law of conservation (2020)*. Is there any scientific evidence to prove this Universal Law? If yes, how to prove it? But our knowledge, observation, research mind and research study, regarding the "New *law of conservation*" say that, energy can be created at a certain point, and energy can be destroyed up to certain limits too. In between creation and destruction, there are conservations; which means, energy gets converted into another form. It is a universal truth wherever there is a creation there is destruction.

NOW WE WILL DISCUSS ABOUT THE NEW LAW OF CONSERVATION

Practical Observation

Take a real-world example of our prime energy source, the *Sun*. It's a well-known fact that *Sun* shines every day and it will do so for eons together. We can see that lot of energy is generated from the Sun's surface per minute as light energy and heat energy, but still the volume of Sun remains unchanged till now. How it is possible? This means that energy is created on Sun's surface as fusion reactions. Whatever it may be, energy is created there. Now, it's a proven fact that energy is created on the surface of Sun.

Now, we will discuss about the sun rays, which comes out from Sun's surface. Sun rays come out with light and heat energy. Light travels at a speed of *2,99,792 kms per second*; which means nearly 3 lakh kilometer per second.

This phenomenon rolls on continuously for lakhs and crores of years and the Scientist say this will go on in future as well. The fact is, who has measured/observed the sun rays travelling? As per our knowledge, the sun rays gets destroyed while travelling, which ultimately means 'energy' gets destroyed.

CONCLUSIONS

Now, it's distinct and clear that the Supreme God power is important in the whole Universe which controls the whole Universal system. Soul power is very important for Human body just like the Supreme God power which controls the whole Cosmos.

The new '*Law of Conservation*' proves that although energy is created at a particular point, it also gets destroyed at a certain limit, which is because of the Supreme God Power in the whole Universe. However, Science's faith on God power cannot be established although we know, many scientists do have faith on God, when they exclaim and say.... Oh God !,. This means they are aware of God power.

ACKNOWLEDGEMENT

We express our sincere thanks to several friends of IRRA Scientist Group, Dr.D.K. Chakarbarty, Mr.A.B.Dhone, Mr.Rajeshji Lyengar, Avinash Parate, Vijay Khode, for help at different stages of this work.
